Like all the written Nerv-Worth statements the following entirely new one has the maker's arm signed to it. This is not always the case with medicine endorsements. The Nerv-Worth way is to print absolutely honest and true words or praise and then to submit the endorser's sit nature and street and number address. FOR THROAT AND LUNGS

MEN who smoke Burley tobacco don't want to smoke any other kind; the green, blue, or red tin is a steady companion.

But until now Burley tobacco couldn't be had in readymade cigarettes. Nobody knew any way to make a Burley cigarette that didn't quickly lose its flavor, when made up in that form.

Until now, we said. Because after years of careful study and experimenting we've found a way to make a Burley cigarette that will keep its rich flavor indefinitely. We toasted the tobacco.

The thing seems simple now; it wasn't simple until we found it. The tobacco-it's toasted; you know what that means when you have a few slices of fresh, crisp, appetizing toast for breakfast; hot, buttered. So try Lucky Strike now; the tobacco-it's toasted.
